

The *Great Introduction to Astrology* by Abū Maʿšar

Edited and translated by Keiji Yamamoto and Charles Burnett, with an Edition of the Greek Version by David Pingree

The following pages contain the original Arabic text, an English translation, the Greek version and the Glossaries in a format in which line numbers provide the reference system, and the means by which the different texts can be compared with each other.

A final edition, newly typeset and corrected, and including a substantial introduction, appendixes and indexes, has been published under the same title by Brill in 2019 in the book series Islamic Philosophy, Theology and Science, vols 106.1-2.
